Product End of Life

Dear Valued Customer,

Since our acquisition of certain Trex Medical assets in 2000, Hologic Inc. has continued to provide replacement parts, on-site and in-house repair services and technical support for many of the products offered by Trex Medical at that time. The continuation of these services was deemed an appropriate business function for the benefit of our loyal customer base.

Hologic has strived over the past seven years to maintain support for this extensive suite of mature products, however, a current assessment of many of the products in the portfolio has determined that the unavailability of some technology and replacement parts prevent us from effectively continuing these services. As a result, an "End of Life" plan for these products has been developed and is currently being made available to our customers. The following will help identify the product type and Manufacturers that are affected:

All Cardiac or Angiographic products manufactured by XRE Corporation/
Angiographic Devices or Trex Medical Corporation.

All General Radiographic, Radiographic/ Fluoro and Electro Physio products
manufactured by Continental X-Ray Corporation, Trex Medical Corporation.

All General Radiographic products manufactured by Bennett or Trex Medical
Corporation.

A detailed "End of Life" plan is posted on our website and should help you in identifying any products that you own that may be affected by this program. To access this plan, [click here](#). For your convenience, products are organized by brand name; i.e.; all XRE Cardiac Cath products can be found in the XRE section, and all the Bennett products will be grouped within the Bennett section. Products within each brand are listed in chronological order, beginning with the earliest date of release.

The "End of Life" plan will not immediately affect customers who are covered by existing Hologic service contracts for the listed products. Please note, however, that those contracts will not be renewable at the ends of their terms, and the applicable End of Life plan provisions will take effect when those contracts expire.

Should you have any difficulty in identifying your product or determining how this program will affect you, please contact Hologic Technical Support at 800-321-4659 for assistance.

We appreciate your past business and support and look forward to serving your mammography equipment needs for many years to come.

Sincerely,

A handwritten signature in black ink that reads "Roger D. Mills". The signature is written in a cursive style with a large, stylized initial 'R'.

Roger Mills
