

CMV Probe**Intended Use**

Analyte Specific Reagent (ASR). Analytical and performance characteristics are not established. This ASR is intended to be used as a component of a laboratory developed test (LDT) used exclusively by laboratories.

Product Description

The Cytomegalovirus (CMV) Probe ASR contains an oligonucleotide designed to detect the UL56 gene of CMV. The oligonucleotide contains a 5' FAM label and a 3' BHQ-1 label.

Materials Provided

CMV Probe (Cat. No. PRD-04986)

Component	Quantity	Concentration
Tubes	1 x 0.53 mL	25 µmol/L

Warnings and Precautions

- A. Analytical and performance characteristics are not established.
- B. Use routine laboratory precautions. Wear disposable, powderless gloves, protective eye wear, and laboratory coats when handling specimens and kit reagents. Wash hands thoroughly after handling reagents.
- C. Dispose of all materials that have come in contact with reagents according to local, state, and federal regulations.

Quality Control

This analyte specific reagent was manufactured and released in accordance with the Hologic quality control and quality assurance procedures.

Storage and Handling

Upon receipt, store material at -15 to -85 °C. Multiple freeze/thaw cycles should be minimized by appropriate aliquoting and should not exceed 3 freeze/thaw cycles.
