

RNA IC Primers**Intended Use**

Analyte Specific Reagent (ASR). Analytical and performance characteristics are not established. This ASR is intended to be used as a component of a laboratory developed test (LDT) used exclusively by laboratories.

Product Description

The RNA IC Primers ASR contains forward and reverse primers designed to amplify the RNA target present in the Panther Fusion Internal Control-S reagent.

Materials Provided

RNA IC Primers (Cat. No. PRD-04307)

Component	Quantity	Concentration
Tubes	4 x 0.53 mL	37.5 µmol/L of each primer

Warnings and Precautions

- A. Analytical and performance characteristics are not established.
- B. For professional use.
- C. Use routine laboratory precautions. Wear disposable, powderless gloves, protective eye wear, and laboratory coats when handling specimens and kit reagents. Wash hands thoroughly after handling reagents.
- D. Dispose of all materials that have come in contact with reagents according to local, state, and federal regulations.

Quality Control

This analyte specific reagent was manufactured and released in accordance with the Hologic quality control and quality assurance procedures.

Storage and Handling

Upon receipt, store material at -15 to -85 °C. Multiple freeze/thaw cycles should be minimized by appropriate aliquoting and should not exceed 3 freeze/thaw cycles.
