Hologic is dedicated to advances in medical technologies that contribute to **long, healthy lives for women**. We bring imaging and intervention together, delivering a continuum of care options for screening, diagnosis and treatment. In the field of breast biopsy, we will continue to work with physicians to discover and deliver more **compassionate and effective solutions for women**.
Tumark® Professional X, Q and Vision Biopsy

The Tumark biopsy site markers provide tissue fixation and visibility in ultrasound, x-ray and MRI.

The 18G deployment device allows for marking the biopsy site, suspicious lesions and lymph nodes in the axilla.

Available Shapes

- X
- Q
- Vision

**Visibility**

Tumark Professional X & Q markers are constructed of sand-blasted nitinol, designed to provide visibility in ultrasound

Visible upon deployment under Ultrasound, Mammography and MRI

**Intelligent design**

Intelligent design provides tissue fixation

Non-resorbing material expands into marker shape upon deployment

Three distinct shapes for ease of identifying between biopsy sites

**Single-handed operation**

Ergonomic handle for single-handed operation allows for simultaneous operation of the ultrasound transducer with the second hand

SecurMark® biopsy site markers — Enhanced

The SecurMark® family of biopsy site markers provides exceptional site marking solutions.

SecurMark site markers are comprised of two components: the permanent marker is made of bio-compatible titanium or stainless steel, while the outer material consists of bio-absorbable suture-like netting that is designed to minimize movement within the biopsy cavity and enhance ultrasound visualization. SecurMark site markers are available in five distinct shapes to allow for multi-site identification.

SecurMark Biopsy Site Markers

**SecurMark for ATEC®**
- Features side deployment delivery system with a flexible cannula.
- For use with ATEC handpieces in stereotactic or ultrasound procedures.

**SecurMark for Celero® and SecurMark Ultrasound**
- Features end deployment using a rigid deployment device with an easy transition hub and a beveled tip for seamless access to the biopsy site.
- Can be used with or without an introducer.
- For use with the Celero breast biopsy device and the Sertera biopsy device.

**SecurMark for Eviva®**
- Utilizes a rigid end-deploy delivery system that requires no pull-back for deployment.
- Part of the Eviva integrated stereotactic solution to ensure easy and accurate delivery.

**SecurMark for MRI**
- Utilizes a rigid-end-deploy device for an integrated MRI solution.
- Permanent component options allow for a wide array of artifact.
ultrasound visibility with multiple shapes

SecurMark Titanium Options

The SecurMark titanium options feature permanent markers made of bio-compatible titanium with the outer layer comprised of bio-absorbable suture-like netting. The titanium markers are available in two distinct shapes for multi-site marking.

SecurMark Stainless Steel Options

To provide a wide array of biopsy site marking options, the SecurMark family also includes stainless steel markers in three new shapes. Like the titanium versions, the stainless steel markers feature the bio-absorbable suture-like netting outer layer and are available for deployment compatible with all Hologic biopsy devices. The permanent stainless steel component provides increased visualization under MRI-guidance.

Available Shapes

- Buckle
- Infinity
- Stoplight
The TriMark marker is our original biopsy site marking solution for use with the ATEC and Eviva breast biopsy systems. Its rigid marker deployment system provides easy and accurate access to the biopsy site. The TriMark biopsy site marker can be used with all ATEC and Eviva needle options, including MRI.

The CeleroMark biopsy site marker is designed for use with the Celero and Sertera biopsy devices. The CeleroMark biopsy site marker features an end deploy beveled tip for smooth marker deployment under ultrasound-guided breast biopsy procedures.

Both the TriMark and CeleroMark site markers are comprised of bio-compatible titanium and are available in two shapes, the cork and the hourglass.
Advanced Breast Health Solutions
in all imaging modalities

Hologic offers an extensive line of comprehensive breast biopsy solutions designed to provide compassionate intervention and treatment.

MRI
Innovation starts with the willingness to listen and the ability to understand. By leveraging the knowledge and insight of leading physicians, technologists and administrators, Hologic provides more choices for ultrasound-guided breast biopsy, from partial to complete removal of benign lesions, to sampling of breast tissue for diagnostic review.

Our goal is to support compassionate intervention for all patients.
