PATIENT INFORMATION REGARDING SELF-COLLECTED SPECIMENS

- A self-collected swab is one way to test for sexually transmitted infections (STIs). Other options are available. If you have questions about the self-collected swab, other sample collection options, or about STIs, consult your health-care provider.

- Self-collection is an option in healthcare facilities if you agree to perform the procedure. Counseling from your health-care provider is available for the self-collection procedure.

- Carefully read the swab self-collection instructions below. If you feel you can perform this self-collection procedure and wish to use this method of testing for STIs, inform your health-care provider.

- Do not take the collection kit or your self-collected specimen out of the clinic.

GENERAL INSTRUCTIONS FOR ALL COLLECTION METHODS

Carefully follow procedures for reliable results. If you have any questions about any procedure, please ask your health-care provider.

1. Wash your hands before starting.

2. In the privacy of the examination room or restroom, you will need to undress, as necessary. You will need to comfortably position yourself to maintain balance during the collection procedure.

3. Open kit package. Remove the swab and the tube. Set the tube aside before beginning instructions below to collect the specimen or specimen requested by your health-care provider.

WARNING: If at any time the contents of the tube are spilled on your skin, wash the affected area with soap and water. If the contents of the tube are splashed in your eyes, immediately flush your eyes with water. Notify your health-care provider if irritation develops. If the contents of the tube are spilled, request a new Aptima Multitest Swab Specimen Collection Kit. Do not take internally.

VAGINAL SWAB SPECIMEN COLLECTION

1. Before proceeding, read the patient information and general instructions above.

2. Partially peel open the swab package as shown in Diagram 1. Remove the swab.

3. Hold the swab in your hand as shown in Diagram 2, placing your thumb and forefinger in the middle of the swab shaft covering the score line (black line).

4. Hold the swab into your vagina about 2 inches (5 cm) inside the opening of the vagina (as shown in Diagram 3) and gently rotate the swab for 10 to 30 seconds.

5. While holding the swab in the same hand, unscrew the cap from the tube as shown in Diagram 4.

6. Immediately place the swab into the transport tube so that the score line (black line) is at the top of the tube as shown in Diagram 5.

7. Carefully break the swab shaft at the score line (black line) against the side of the tube as shown in Diagram 6.

8. Immediately discard the top portion of the swab shaft as shown in Diagram 7.

9. Tightly screw the cap onto the tube as shown in Diagram 8. Return the tube as instructed by your health-care provider.

Important Information to Consider

- IF YOU ARE PREGNANT, PLEASE INFORM YOUR HEALTH-CARE PROVIDER.

- Before you collect a vaginal swab specimen, inform your health-care provider if you have:
  - unusual vaginal discharge or bad odor
  - pain with sexual intercourse
  - pelvic pain, fever, lower abdominal pain
  - a fever or other flu-like illness
  - unusual vaginal discharge or bad odor
  - pelvic pain, fever, lower abdominal pain

- Symptoms can be due to pelvic inflammatory disease (PID). Prompt diagnosis and treatment of PID can help prevent infertility and ectopic pregnancy associated with PID.

PENILE MEATAL SWAB SPECIMEN COLLECTION

1. Before proceeding, read the patient information and general instructions above.

2. Partially peel open the swab package as shown in Diagram 1. Remove the swab.

3. Hold the swab in your hand as shown in Diagram 2, placing your thumb and forefinger in the middle of the swab shaft covering the score line (black line).

4. Close the swab shaft in the same hand, unscrew the cap from the tube as shown in Diagram 4.

5. While holding the swab in the same hand, unscrew the cap from the tube as shown in Diagram 5.

6. If the soft tip is touched, the swab is laid down, or the swab is dropped, request a new Aptima Multitest Swab Specimen Collection Kit. Do not spill the contents of the tube. If the contents of the tube are spilled, request a new Aptima Multitest Swab Specimen Collection Kit.

7. Immediately place the swab into the transport tube so that the score line (black line) is at the top of the tube as shown in Diagram 6.

8. Carefully break the swab shaft at the score line (black line) against the side of the tube as shown in Diagram 7.

9. Tightly screw the cap onto the tube as shown in Diagram 8. Return the tube as instructed by your health-care provider.
PATIENT INFORMATION REGARDING SELF-COLLECTED SPECIMENS

- A self-collected swab is one way to test for sexually transmitted infections (STIs). Other options are available. If you have questions about the self-collected swab or other sample collection options, or about STIs, consult your health-care provider.
- Self-collection is an option in healthcare facilities if you agree to perform the procedure. Counseling from your health-care provider is available for the self-collection procedure.
- Carefully read the self-collection instructions below. If you feel you can perform this self-collection procedure and wish to use this method of testing for STIs, inform your health-care provider.
- Do not take the collection kit or your self-collected specimen out of the clinic.

GENERAL INSTRUCTIONS FOR ALL COLLECTION METHODS

Carefully follow procedures for reliable results. If you have any questions about any procedure, please ask your health-care provider.

1. Wash your hands before starting.
2. In the privacy of the examination room or restroom, you will need to undress, as necessary. You will need to comfortably position yourself to maintain balance during the collection procedure.
3. Open kit package. Remove the swab and the tube. Set the tube aside before beginning instructions below.

WARNING: If at any time the contents of the tube are spilled on your skin, wash the affected area with soap and water. If the contents of the tube are splashed in your eyes, immediately flush your eyes with water. Notify your health-care provider if irritation develops. If the contents of the tube are spilled, request a new Aptima Multitest Swab Specimen Collection Kit.

RECTAL SWAB SPECIMEN COLLECTION

1. Before proceeding, read the patient information and general instructions above.
2. Partially peel open the swab package as shown in Diagram 1. Remove the swab.
   - Do not touch the soft tip or lay the swab down.
   - If the soft tip is touched, the swab is laid down, or the swab is dropped, request a new Aptima Multitest Swab Specimen Collection Kit.
3. Hold the swab as shown in Diagram 2, placing your thumb and forefinger in the middle of the swab shaft covering the score line. Do not hold the swab shaft below the score line.
   - Immediately place the swab into the transport tube so that the score line is at the top of the tube as shown in Diagram 5.
4. Carefully insert the swab into your rectum about 1-2 inches (3-5 cm) past the anal margin (the outside of the anus) and gently rotate the swab for 5 to 10 seconds as shown in Diagram 3.
   - While holding the swab in the same hand, unscrew the cap from the tube as shown in Diagram 4. Do not spill the contents of the tube.
   - If the contents of the tube are spilled, use a new Aptima Multitest Swab Specimen Collection Kit.
5. Immediately discard the top portion of the swab shaft as shown in Diagram 7.
6. Immediately place the swab into the transport tube so that the score line is at the top of the tube as shown in Diagram 5.
7. Carefully break the swab shaft at the score line against the side of the tube as shown in Diagram 6.
8. Carefully insert the swab into your mouth as shown in Diagram 3, ensuring contact with bilateral tonsils (the tonsils on both sides of your mouth, unless your tonsils have been removed) and the back of your throat, then withdraw the swab without touching the inside of your cheeks or tongue.
9. Tightly screw the cap onto the tube as shown in Diagram 8. Return the tube as instructed by your health-care provider.

THROAT SWAB SPECIMEN COLLECTION

1. Before proceeding, read the patient information and general instructions above.
2. Partially peel open the swab package as shown in Diagram 1. Remove the swab.
   - Do not touch the soft tip or lay the swab down.
   - If the soft tip is touched, the swab is laid down, or the swab is dropped, request a new Aptima Multitest Swab Specimen Collection Kit.
3. Hold the swab as shown in Diagram 2, placing your thumb and forefinger in the middle of the swab shaft covering the score line. Do not hold the swab shaft below the score line.
   - While holding the swab in the same hand, unscrew the cap from the tube as shown in Diagram 4. Do not spill the contents of the tube.
   - If the contents of the tube are spilled, use a new Aptima Multitest Swab Specimen Collection Kit.
4. Carefully insert the swab into your mouth as shown in Diagram 3, ensuring contact with bilateral tonsils (the tonsils on both sides of your mouth, unless your tonsils have been removed) and the back of your throat, then withdraw the swab without touching the inside of your cheeks or tongue.
5. Immediately place the swab into the transport tube so that the score line is at the top of the tube as shown in Diagram 5.
6. Carefully break the swab shaft at the score line against the side of the tube as shown in Diagram 6.
7. Tightly screw the cap onto the tube as shown in Diagram 8. Return the tube as instructed by your health-care provider.
