Aptima Assay Fluids Kit (Tigris® DTS® System)

For in vitro diagnostic use.
Rx only

Intended Use
The Aptima Assay Fluids Kit is used with the Aptima Assays on the Tigris DTS System. Use the Assay Fluids Kit according to the instructions outlined in the appropriate assay package insert and the Tigris DTS System Operator’s Manual.

Reagents
Reagents for the Aptima Assay Fluids Kit are provided below for the Tigris DTS System. Reagent identification Symbols are also listed next to the reagent name.

Materials Provided
Aptima Assay Fluids Kit (1 box) (Cat No. 302382)

Materials Required But Not Provided
Appropriate Aptima Assay Kit(s)
Tigris DTS System
Household bleach (5%-7% sodium hypochlorite)

Materials Available from Hologic
Appropriate Aptima Assay Kit(s)
Tigris DTS System (Cat. No. 105118)

Warnings and Precautions
A. Fluids in the kit are not corrosive.
B. Use routine laboratory precautions. Do not pipette by mouth, do not eat, drink, or smoke in the laboratory work area. Wash hands thoroughly after handling Aptima Assay Fluids.
C. Avoid microbial and ribonuclease contamination of Aptima Assay Fluids.
D. Do not top off Assay Fluids containers.
E. Some reagents of this kit are labeled with risk and safety symbols.

Note: Hazard Communication information for labeling of globally marketed products reflects the US and EU Safety Data Sheets (SDS) classifications. For hazard communication information specific to your region, refer to the region specific SDS on the Safety Data Sheet library at www.hologicSDS.com.
Storage and Handling Requirements

A. The Aptima Assay Fluids are stable when stored unopened at 15° to 30°C until the expiration date.

B. Do not use after the expiration date. **Do not freeze.** Once opened, Aptima Assay Fluids are stable for 30 days when stored at room temperature.

C. The Aptima Assay Fluids may be used between 15° and 30°C and 20% to 85% relative humidity.

Procedural Notes

Deactivation Fluid

Pour undiluted bleach into an empty Tigris DTS System Deactivation Fluid bottle until the liquid level is between the two solid lines on the bottle. Open a new bottle of Buffer for Deactivation Fluid and pour the contents into the Deactivation Fluid bottle. After adding the Buffer for Deactivation Fluid, make sure that the liquid level is above the Minimum Total Fill mark on the Deactivation Fluid bottle. Deactivation Fluid is stable for 30 days when stored at room temperature (15° to 30°C) and can be used for up to 14 days after loading onto the Tigris DTS System.

Limitations

Assay must be performed, and results interpreted according to the procedures of the appropriate assay kit package insert and the Tigris DTS System Operator’s Manual.

Deviations from these procedures may produce unreliable results. Use of outdated Aptima Assay Fluids may produce erroneous results.
Expected Values

Please reference the appropriate assay package insert for expected results.
