

### **EBV Probe**

#### Intended Use

Analyte Specific Reagent (ASR). Analytical and performance characteristics are not established. This ASR is intended to be used as a component of a laboratory developed test (LDT) used exclusively by laboratories. Laboratories may develop their own LDTs using one or more ASRs and/or general laboratory reagents for *in vitro* diagnostic purposes.

## **Product Description**

The Epstein-Barr virus (EBV) Probe ASR contains an oligonucleotide designed to detect the EBNA-1 gene of EBV. The oligonucleotide contains a 5' CAL Fluor Orange 560 label and a 3' BHQ-1 label.

#### **Materials Provided**

EBV Probe (Cat. No. PRD-04989)

Component	Quantity	Concentration
Tubes	1 x 0.53 mL	25 μmol/L

### **Warnings and Precautions**

- A. Analytical and performance characteristics are not established.
- B. Use routine laboratory precautions. Wear disposable, powderless gloves, protective eye wear, and laboratory coats when handling specimens and kit reagents. Wash hands thoroughly after handling reagents.
- C. Dispose of all materials that have come in contact with reagents according to local, state, and federal regulations.

### **Quality Control**

This analyte specific reagent was manufactured and released in accordance with the Hologic quality control and quality assurance procedures.

# Storage and Handling

Upon receipt, store material at -15 to -85 °C. Multiple freeze/thaw cycles should be minimized by appropriate aliquoting and should not exceed 3 freeze/thaw cycles.
