

# Affirm® Upright Breast Biopsy Guidance System

## A better solution<sup>1</sup> – for you and your patients

The world's first 3D™ breast biopsy guidance system gives you the power to quickly transition from screening to 2D or 3D™ interventional procedures using any Hologic 3D Mammography™ capable system. With the Affirm® 3D™ upright biopsy option, you can clearly localize lesions often visible only with tomosynthesis imaging – to help you confidently biopsy even challenging cases.

# Affirm®

Breast Biopsy Guidance System

### Superior Imaging<sup>2</sup>

Pinpoint subtle lesions and faint calcifications – including those that may only be visible with tomosynthesis with the 3D™ biopsy option.

### Streamlined workflow

Efficient, fast, easy to learn and use. The system provides a simplified user interface to help deliver a fast biopsy with fewer steps and a lower patient dose.<sup>2</sup>

### Versatile Solution

Transition from screening to interventional procedures to biopsy a wide spectrum of patients either seated or decubitus. Quickly and easily switch between standard and lateral needle approaches.

## Simplify the breast biopsy process – even for challenging procedures.

Perform fast, effective biopsies with the Affirm® upright system. It's designed from the ground up to integrate with the Selenia® Dimensions® and 3Dimensions® systems – to streamline workflow and accelerate procedures. The Affirm® upright system leverages the same proven imaging chain as your mammography system to improve 3D™ visualization of suspicious lesions. Plus, the lateral arm accessory enhances your access to a wide range of challenging lesions, so you can address those – quickly, easily, and confidently.

Helps reduce time under compressions, lower x-ray dose, and offer a better patient experience.<sup>2,3</sup>

\* Average procedure time.

## Superior Imaging<sup>2</sup>

- **The proven direct-capture detector** in your Selenia® Dimensions® or 3Dimensions® mammography system ensures that you can biopsy lesions found during screening with certainty.
- **A large field of view** of up to 18 cm x 24 cm for high-resolution stereotactic 2D or 3D™ images makes visualizing suspicious areas simple.
- **Quickly pinpoint subtle lesions and faint calcifications** – including those that may only be visible with tomosynthesis.

## Streamlined Workflow

- **One-click targeting<sup>4</sup>** enables you to quickly localize lesions with confidences.
- **Automated tube-head positioning** for both 2D and 3D™ imaging eliminates the need to manually adjust the x-ray tube location, helping to accelerate procedures.
- **Intuitive design**, simple touch-screen controls, and clear displays of safety margins make it easy for mammography users to quickly learn interventional procedures.
- **Quick set-up and preprogrammed needles** virtually eliminate the need for manual calculations.

## Versatile Solution

- **Quickly transform** your Selenia® Dimensions® or 3Dimensions® system into a powerful biopsy tool with this lightweight portable device.
- **Upgrade to 3D™ biopsy** capability when you are ready with a simple software update.
- **Access challenging lesions** with the optional lateral arm accessory. It installs quickly to present the needle parallel to the detector – especially valuable for thinly compressed breasts.

## One comprehensive solution- yours

Hologic's interventional products are designed to work together as a complete set of breast biopsy solutions to help you improve efficiency, optimize the patient experience, and deliver the best outcomes possible. From image guidance systems, to breast biopsy devices, specimen imaging, site markers and accelerated treatment options, Hologic provides the most comprehensive solutions to treat your patients. Be sure to talk with your Hologic representative about which breast biopsy solutions are right for you and your patients.

The Hologic Affirm portfolio includes both upright and prone breast biopsy guidance systems, so you can provide minimally invasive procedures to the largest group of patients – without compromise. Since these systems complement one another, you can easily meet the needs of your patients regardless of body size or positioning preference. Hologic breast biopsy systems share many of the same advanced technologies, software, features, and operations to deliver superior imaging<sup>2</sup>, streamlined workflow, and maximal access. It's the reason so many doctors choose Hologic systems to help improve patient comfort and satisfaction.
