

Faxitron™ Path specimen radiography system

Work efficiently with more imaging area.

Introducing the Faxitron™ Path specimen radiography system from Hologic.

With a large field of view and high resolution detector the Faxitron™ Path system is designed to help you deliver greater efficiency and exceptional patient care in the Pathology lab.

Faxitron™ Path system features:

High-Resolution Imaging

The Faxitron™ Path system has a magnification shelf with field of view guides and automatic position detection that provides up to 6X geometric magnification, which can locate the smallest calcifications in tissue samples to ensure accurate diagnoses.

Wide Energy Range

The system can image both thin slices and large specimens, and proprietary algorithms enable optimal image exposure and clarity with Automatic Exposure Control (AEC).

Convenient Interface

The continuous surface keyboard allows for ease of use and the system has the ability to save images in a variety of file formats.

Easy to Use

No additional training or specialized x-ray requirements are needed to operate the Faxitron™ Path system, and the system plugs into any standard A/C outlet.

Optimized Design

The Faxitron™ Path system allows for optimal placement at the point-of-care. Its stainless steel chamber was designed with no right angles to allow for easy cleaning.

Improved Efficiency

Routine access to high-resolution imaging with the Faxitron™ Path system results in faster final report generation. The software also has the ability to send multiple annotated images to PACS at the touch of a button.

Optimal Imaging Quality

The Faxitron™ Path system allows the user to optimally image anything from breast tissue slices and intact mastectomies to bone and fetal remains. The system's large detector has a high resolution for its size and accommodates a broad range of samples.

A comprehensive family of solutions

The Faxitron™ Path system fits right into Hologic's full range of specimen radiography solutions. Hologic has a complete set of specimen imaging products for Radiology, Surgery and Pathology to help you improve efficiency, optimize the patient experience and deliver the best outcomes possible. Talk to your representative about the solutions that best suit your needs, ensuring your patients have the best possible care when they need it most.

Faxitron™ Core specimen radiography system

Trident® HD specimen radiography system

Faxitron™ Path+ specimen radiography system

Be sure to talk with your Hologic representative about which specimen radiography solution is right for your patients.

Faxitron™ Core system also known as CoreVision® System.

Faxitron™ Path system also known as PathVision™ System.

Faxitron™ Path+ system also known as PathVision™ XL System.
