Global Access Initiative is our solution to mitigating the burden of viral diseases in areas of high prevalence. This cost-effective and financially sustainable program aims to transform the world of diagnostics by improving access to critical infectious disease testing.

All-inclusive testing: No upfront cost or capital expenditure.

$12.00 per patient test includes*:

- Instrument placement
- Reagents and consumables
- Service and maintenance
- Freight and logistics
- Replacement tests†

As part of our commitment to the 2030 UNAIDS 95-95-95 goal, the Global Access Initiative includes HIV-1 testing and other viral targets. Qualified assays include:

- **Aptima® HIV-1 Quant Dx Assay**
  Aids in the diagnosis, confirmation and clinical management of HIV-1 infection. Now WHO prequalified.

- **Aptima® HCV Quant Dx Assay**
  Aids in the diagnosis, confirmation and clinical management of HCV infection.

- **Aptima® HBV Quant Assay**
  Aids in the clinical management of HBV infection.

- **Aptima® HPV Assay**
  Detects 14 high-risk HPV types.

---

* Testing services do not include ancillary costs, for example those associated with sample collection, sample transport, laboratory staff time, laboratory infrastructure, generic laboratory supplies (e.g., primary collection tubes, disposable gloves, bleach, bleach bottles, bleach enhancer, waste bottles, etc.), inventory management, or general administration and overhead costs.

† One set of controls and calibrators per kit and documented instrument errors.
Expand testing in your space.

Infrastructure Requirements

To participate in the Hologic Global Access Initiative, laboratories must meet certain infrastructure requirements.

**Physical Space**
Sufficient space to accommodate the Panther system: 122 cm (w) x 81.5 cm (d) x 175 cm (h). Sufficient space to accommodate a rocker, centrifuge and cold storage for additional samples and reagents.

**Electrical Requirements**
An electrical connection that supports up to a 1400 W draw, with a dedicated 20-amp circuit. A backup generator capable of supporting all equipment.

**Air Conditioning**
Central or wall-mounted air conditioning with adequate capacity to maintain a temperature between 15°C to 30°C and relative humidity from 20%-85%.

**Sink**
A sink or washbasin for liquid-waste disposal.

**Refrigerator**
One or more refrigerator(s) with temperature control, maintained at 2°C to 8°C, to store samples and reagents.

**Freezer**
One or more freezer(s) with temperature control, maintained at -15°C to -5°C, to store calibrators and controls.

Testing Volume Requirements

To be eligible for the Hologic Global Access Initiative, the purchasing country or organization must share a site-specific forecast for any new Panther system placement, which anticipates:

- Processing volumes that contribute to a national average of 30,000 patient samples per eligible instrument per year within 12 months of placement.³

 Eligible Countries**

- Angola
- Benin
- Botswana
- Burkina Faso
- Burundi
- Cambodia
- Cameroon
- Cape Verde
- Central African Republic
- Comoros
- Congo
- Democratic Rep. of the Congo (DRC)
- Egypt
- Ethiopia
- Gambia
- Ghana
- Guinea
- Guinea-Bissau
- Haiti
- India
- Indonesia
- Ivory Coast
- Kenya
- Laos
- Lesotho
- Liberia
- Malawi
- Malaysia
- Mali
- Mauritania
- Mongolia
- Mozambique
- Myanmar
- Namibia
- Nepal
- Nigeria
- Pakistan
- Papua New Guinea
- Rwanda
- South Africa
- Sri Lanka
- Swaziland
- Tanzania
- Timor-Leste
- Togo
- Uganda
- Vietnam
- Zambia
- Zimbabwe

³Hologic will provide an uninterrupted power supply and surge protector and make necessary electrical modifications during installation.

³ Inclusive of all eligible assays and sample types.

** List of eligible countries is for initiative participation. Not all assays are available in each of the countries listed.
